CHANGE DESCRIPTION:			
<p>The Mini-B USB 2.0 vertical connector used by the Affected Part Numbers has changed. This change impacts the height of the connector off the camera printed circuit board. The new connector is 0.63 mm longer than the old connector, as shown in the figure below. No other dimensions have changed that affect the total exterior dimensions of the camera. The new connector is functionally identical to that of the old connector.</p>
